

# Project Design Phase-1

## Proposed Solution Template

Date	24/09/2022
Team Head	Vijayalakshmi.K
Project Name	A Novel method for Handwritten. Digit Recognition systems
Maximum marks	2 points

### Proposed Solution Template:

S.no	Parameter	Decription
1.	Problem statement(problem to be solved)	To address the challenges fased by deaf-mute persons in daily life so they can interact with society &feel powerfull
2.	Idea/Solution description	Vice versa using Convolution Neural Network in desired language
3.	Novelty/Uniqueness	Deploying & improving our solution to provide Faster response in Desired language
4.	Social Impact/Customer Satisfaction	1.The application provides good Interfacing 2.It leads to the development of logically advanced society
5.	Business Model(Revenue Model)	The application will be made available to more recipients, Which will accelerate growth
6.	Scalability of the Solution	The user will find it very simple to use &update Encoding the errors &decoding with better accuraacy
